DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Italy on 3/12/99. It is noted, however, that applicant has not filed a certified copy of the MI 99A000521 application as required by 35 U.S.C. 119(b).

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the micropumps must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claims 3-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. As set forth by claim 3, it is unclear as to how the chambers can lie both side by side and one inside the other. Correction is required.

6. In Claims 4 and 5, the Applicant is required to clarify to what the claim is intended to be drawn to, i.e., either the mask alone or the combination of the mask and the source of pressurized air. The Applicant sets forth the combination of the mask and the source of pressurized air when describing the chambers being alternately connected to the pressurized air source and the micropumps being connected to the chamber, which is inconsistent with Claim 1, that sets forth the subcombination of chamber which **can be** connected to a source of pressurized air. Applicant is required to make the language of the claims consistent with the intent of the claims. It should also be noted that in considering the claims on the merits, the Examiner will consider the claims as drawn to the subcombination.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Bennett (US 3,330,274).

9. **As to claim 1**, Bennett teaches a face or nose mask for non-invasive ventilation of a patient comprising a mask body **12** provided with an inlet **18** for connection to a

ventilation apparatus **20** and perimetrically provided with a sealing element **14** for application to the face of a patient, characterized in that the sealing element comprises at least one first chamber and at least one second chamber (**See Fig. 7**) which can be connected separately to a source of a pressurized air.

10. **As to claim 2**, Bennett teaches a mask in that the first and second chambers have a closed perimeter.

11. **As to claim 3**, Bennett teaches a mask in that the first and second chambers lie side by side, one inside the other.

12. **As to claims 4 and 5** which depend on claim 1 and in which case the source of pressurized air is not positively recited, the limitations of claims 4 and 5 are read as intended use by the Examiner and as such the mask of Bennett is capable of being connected to the source of pressurized air as recited,

Conclusion

13. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 5660174, US 4971051, US 4799477, US 3330273, US 2875757, US 2749910, and US 2047216.
